PORTABLE FIELD SHOWER SET WITH SINKS

CONTRACTOR NAME:	Celina Tent Inc. (CELINA)
MANUFACTURING SOURCE COMPANY:	Highland Engineering Inc. (HEI)
PART NUMBER OR NSN:	Part #: 10909

SPECIFICATIONS AS APPLICABLE:

SPECIAL/ADDITIONAL FEATURES:

The Portable Field Shower Set with Sinks (4S4SPFSS) is a complete self-contained system tailored to the needs of a military user. The 4S4SPFSS features numerous setup scenarios and options. The 4S4SPFSS comes complete with all necessary hoses and fittings for operation.

Water is supplied to the unit from the supplied 3,000 gallon source water tank. The water pressure and water heating is supplied by the included supply pump and heating skid. The skid consists of an electrically driven self-priming supply pump which delivers up to 950 gallons/hour. The skid also consists of a 50 gallon capacity fuel tank. Water heat is via an on-demand diesel (multi-fuel also) water heater. The heater can provide up to 41 kW of heat. A tempered mixed water supply to the showers is provided by a safety tempering valve.

The 4S4SPPFS is provided with 4 individual shower stalls and 2 sink tables with 2 sinks and mirror each. Each stall is made of an aluminum structure and is collapsible and stackable for easy storage, transport, and shipment. The stalls set up in just minutes and provide for private, roomy showers. The system can operate with different number of shower stalls and sink tables as required.

Waste water is removed from the stalls via a diaphragm pump. Waste water can be directed to a local receptacle or directed and stored within the supplied 3,000 gallon waste water tank.
