C36 SERIES OVERVIEW
CELINA RX Series Rapid Expeditionary Shelter

THE NEXT GENERATION OF EXPEDITIONARY SHELTERS

The **CELINA RX Series** delivers a new approach to expeditionary shelter systems, combining rapid deployment, lightweight construction, and mission-driven flexibility. Its innovative hinged aluminum frame and modular design simplify setup, reduce transportation demands, and maximize usable space. Built for fast-moving operations, the RX Series provides reliable, adaptable shelter solutions for military, emergency response, and humanitarian applications.

Features

- **Rapid Deploy Exoskeleton Frame** The external frame design allows the shelter to deploy quickly while maximizing interior space and simplifying setup.
- **Integrated Floor and Liner System** Provides a clean, functional operating environment immediately after deployment.
- **Modular Architecture Available** in multiple lengths and capable of supporting future complexing and expansion options.
- **Berry Amendment Compliant** Option Available in U.S.-manufactured configurations supporting Department of War procurement requirements

Intended Uses

Designed For Mobility

Unlike traditional base camp shelters, the RX Series was built for missions where speed matters.

- Rapid under-canopy time
- Tool-less assembly
- Small crew deployment
- Compact transport footprint
- Modular shelter configurations
- Minimal logistics burden
- Expeditionary-focused design
